

Regenerative Cotton Application

Due: November 30, 2020

- 1. Please provide your:**
 - a. Name:
 - b. Email:
 - c. Mobile phone:
- 2. Please describe your farm:**
 - a. Location
 - b. Size
 - c. Climate (average annual temperature, rainfall, and number of frost-free days)
 - d. Soils
- 3. Please briefly describe your current management practices and the year you began using them, including:**
 - a. Crop Rotation
 - b. Nutrient Management Program
 - c. Crop Crops (if present)
 - d. Tillage Practices (or lack of tillage)
 - e. Pest Management Program
 - f. Any Other Pertinent Information You Care to Provide
- 4. For each criteria below, please briefly describe the practices or approach you use each year to:**
 - a. Minimize soil disturbance
 - b. Maximize soil cover

- c. Maximize the presence of living roots
 - d. Maximize biodiversity
- 5. Please briefly describe any changes you have observed by using these practices on:**
- a. Yield
 - b. Profitability
 - c. Soil Properties
 - d. Inputs Needed (e.g., fertilizer, pesticide)
- 6. Please attach a copy of any documentation you have on how your soils have improved since you began using the practices you described above.** Examples include:
- Soil test results taken before using soil health/regenerative practices compared to soil test results taken in the years after implementing soil health/regenerative practices
 - Any measures of soil health such as density, aggregate stability, organic matter, and infiltration
- 7. Please attach a copy of any documentation you have on the environmental benefits of your farm's management practices.** Examples include modeled or measured impacts on:
- water quality,
 - air quality,
 - carbon emissions,
 - biodiversity, and
 - others

*Return Completed Applications and Attachments
