**Regenerative Cotton Program Application**

1. **Please describe your farm:**
   a. Location
   b. Size
   c. Climate (average temperature, average rainfall, and number of frost free days per year)
   d. Soils

2. **Please briefly describe your current management practices, including:**
   a. Crop Rotation
   b. Nutrient Management Program
   c. Crop Crops (if present)
   d. Tillage Practices (or lack of tillage)
   e. Pest Management Program
   f. Any Other Pertinent Information You Care to Provide

3. **Please provide the approximate year you began using each of these management practices, if applicable:**
   a. Crop Rotation
   b. Nutrient Management Program
   c. Crop Crops (if present)
   d. Tillage Practices (or lack of tillage)
   e. Pest Management Program
   f. Any Other Pertinent Information You Care to Provide
4. Please briefly describe any changes you have observed by using these practices on:
   a. Yield
   b. Profitability
   c. Soil Properties
   d. Inputs Needed (e.g., fertilizer, pesticide)

5. Please attach a copy of any documentation you have on how your soils have improved since you began using the practices you described above practices. Examples include:
   - Soil test results taken before using soil health/regenerative practices compared to soil test results taken after implementing soil health/regenerative practices
   - Any measures of soil health such as density, aggregate stability, organic matter, and infiltration

6. Please attach a copy of any documentation you have on the environmental benefits of your farm’s management practices. Examples include modeled or measured impacts on:
   - water quality,
   - air quality,
   - carbon emissions,
   - biodiversity, and
   - others
